LEADING THE WAY

Our Company

Westinghouse Lighting is a well-recognized global brand and a market leader in the lighting fixture and ceiling fan industries. Known for innovative products of the highest quality, we continue to expand our product offering year after year.

Our Commitment

For over 70 years, dedication to customer relationships has consistently been our greatest priority at Westinghouse Lighting. We have built and maintained a solid reputation for quality products, timely shipments and friendly service.

QUALITY, INNOVATION & COMMITMENT

Our Products

We offer a wide assortment of indoor and outdoor lighting fixtures and ceiling fans, ranging from traditional to contemporary. Our decorative glassware and shade collection offers stylish options for any décor, while our selection of replacement glassware, lamp parts and ceiling fan accessories helps with any repair or replacement need.

Our People

Our knowledgeable, experienced and passionate team of people has been the cornerstone in our continued success and growth throughout the years. We stand ready to offer support and long term solutions for all of your lighting needs.

LIGHT FIXTURES

Energy-Efficient LED Fixtures

Westinghouse LED fixtures offer something for every design style, from modern to traditional. Energy-efficient and long-lasting, LED lighting fixtures provide savings and convenience.

Hanging / Pendant Fixtures

A room's focal point is often an exquisite chandelier or statement-making pendants. From contemporary to traditional, our diverse assortment of styles will add simple elegance to any room.

All light fixtures in this catalog are Underwriter Laboratories or ETL Listed for safety. All Westinghouse light fixtures are warranted against defects in material and workmanship for a period of five years from their purchase date.

Ceiling / Wall Fixtures

Bring new life and light to any space with our wide range of attractive ceiling and wall fixtures. Available in styles and sizes that will accentuate, illuminate and complement any décor.

Outdoor Fixtures

WET LOCATION RATED

Lighting fixtures add security, personality, and a warm, welcoming touch outside a home. The timeless designs of Westinghouse outdoor lighting fixtures can change any home from ordinary to extraordinary.

Look for these symbols to indicate important energy-saving features for light fixtures.

Integrated Dimmable LED

Integrated LED

Dimmable LED Lamps

Non-Dimmable LED Lamps

ENERGY-EFFICIENT LED LIGHT FIXTURES

From sleek modern pendants, to traditional outdoor lanterns, and durable work lights, Westinghouse offers a wide variety of LED fixtures. All our LED lighting designs provide long-lasting performance, significant energy savings and unmatched convenience.

CEILING FANS

Low Ceilings

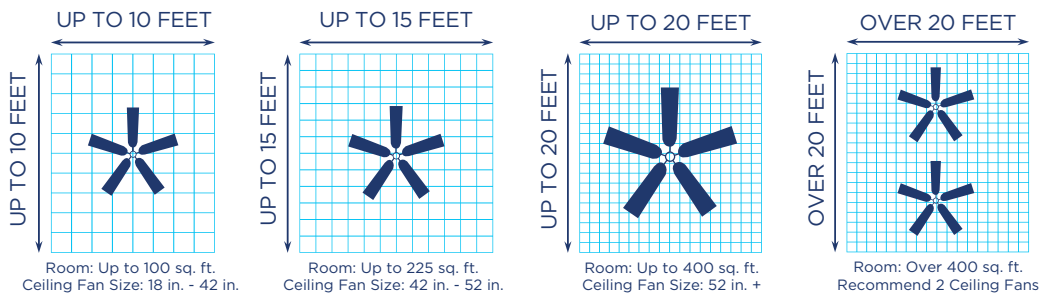

Westinghouse offers a wide array of attractive hugger, low profile, and combo mount ceiling fans that are ideal for rooms with low ceilings.

Standard 8 Ft. Ceilings

In rooms with standard 8 ft. ceilings, choose to mount your ceiling fan with or without a down rod.

What Size Ceiling Fan Do You Need?

In order to ensure completely energy-efficient operation, make sure the size of the ceiling fan is appropriate for the size and height of your room. If the ceiling fan is too small for the room, it has to run at a higher speed in order to be effective, which wastes energy.

All ceiling fans in this catalog are UL or ETL Listed.

THE BEST CEILING FAN FOR EVERY ROOM

High Ceilings

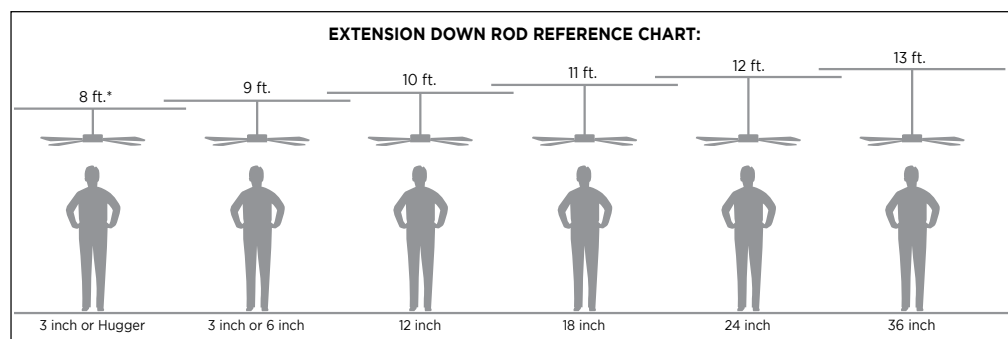

Maximize the use of your ceiling fan in rooms with high ceilings by installing an extension down rod.

Angled Ceilings

In rooms with angled or sloped ceilings, an extension down rod should be installed with the fan to optimize performance. For remote control installation, a cathedral ceiling fan canopy kit is recommended.[†]

What Size Down Rod Do You Need?

*For 8 ft. ceilings, hugger (low profile) ceiling fans can be used.

[†]See page 202 for the cathedral ceiling fan canopy kit and extension down rod product assortment.

OPTIMIZE YOUR CEILING FAN'S EFFICIENCY

DC Motor Fans

A Smart Choice

DC motors offer significant energy savings, consuming up to 57% less energy compared to AC ceiling fans. This means reduced operating costs and a minimized environmental impact. These highly-efficient ceiling fans also boast more speed options, faster acceleration, extremely balanced construction, and incredibly quiet operation.

Look for this symbol throughout this catalog to indicate our DC motor fans.

DC Energy-Saving Motor

LED Light Options

Integrated LED or LED Lamps

Many Westinghouse fans include energy-efficient LED lamps. On average, LEDs consume 80% less energy when compared to incandescent lamps and are mercury-free, which means considerably reduced energy costs and a minimized carbon footprint. Plus, they last much longer than any alternative, so changing lamps in hard-to-reach ceiling fans will become a rare occurrence.

Look for these symbols throughout this catalog to indicate our various LED fans.

Integrated Dimmable LED

Integrated LED

Dimmable LED Lamps

Non-Dimmable LED Lamps

ENERGY GUIDE LABELS

As of Fall 2018, new FTC Energy Guide Labels are included on all ceiling fan packaging. These new yellow labels offer helpful information regarding averages for airflow, wattage and energy costs.

NEW FTC ENERGY GUIDE LABELS

Westinghouse will continue to show the Airflow Performance Label with the actual performance specifications at different speeds on applicable fans.

AIRFLOW PERFORMANCE LABEL

Performance and Energy Information			
Fan Speed	Airflow (CFM)	Power Use (Watts)	Airflow Efficiency (CFM/Watt)
Low	1,184	11	108
Medium	2,591	26	100
High	3,914	56	70

Performance / Energy

Understand Your Ceiling Fan's Performance Characteristics

- **Airflow** is measured in **CFMs** (Cubic Feet per Minute or volume of air the ceiling fan can move).
- **Watts Used** is the amount of electricity used by the ceiling fan.
- **Efficiency** is measured in **CFM/Watts** (amount of air a ceiling fan moves in CFM divided by the amount of electricity it uses in Watts).

Summer / Winter Mode

Most of our ceiling fans include a reversible switch allowing you to keep your room cool in the summer or re-circulate warm air from the ceiling in the winter.

A Pleasant, Gentle Breeze

In the summer, Westinghouse ceiling fans keep your home pleasantly cool. The ceiling fan runs counterclockwise, and sets the air in motion. The airflow creates a wind chill effect on your skin. Summer mode allows you to lower energy costs while keeping you cool.

Increase Comfort Level

In the winter, Westinghouse ceiling fans can be switched to the clockwise direction. As a result, the warm air that collects near the ceiling is distributed evenly throughout the room and eliminates cold spots and drafts. It dramatically increases your comfort level and decreases heating costs.

See pages 196-197 for ceiling fans that have a reverse airflow function.

CONTEMPORARY CEILING FANS

Featuring a wide range of modern and transitional styles, our contemporary collection of ceiling fans captures the essence of today's lifestyle trends with striking, stylish designs and sleek finishes.

Techno II

Cool large areas and lofts in style with a highly-efficient DC motor and LED light kit.

EXTENSION DOWN RODS

White

Antique Brass

Brushed Nickel

Oil Brushed Bronze

For optimum performance, ceiling fan blades should be at least 7' from the floor but no higher than 8-9' in order to best cool a room.

For ceilings 9' and higher, an extension down rod is recommended to bring the ceiling fan down to the proper height above the floor.

1/2" EXTENSION DOWN RODS

Finish	12"	24"	36"
Antique Brass	77241	77244	N/A
Brushed Nickel	77491	77492	N/A

CEILING FAN & LIGHT FIXTURE ACCESSORIES

From ornamental ceiling medallions to secure support braces and boxes, Westinghouse offers a full line of both decorative and functional accessories to enhance and complete any ceiling fan or light fixture installation.

Recessed Light Converter

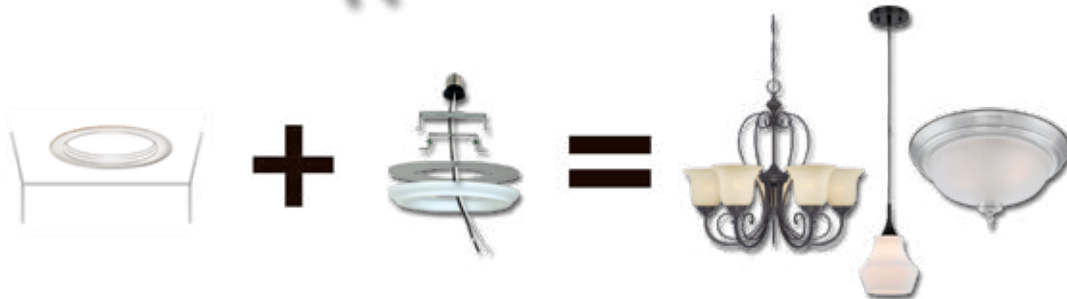

Transform existing recessed lighting into a pendant or other light fixture!

01011 Recessed Light Converter

- Quick and easy home upgrade with no remodeling.
- Adjust to any recessed can size between 4" - 6" diameter.
- Works with existing recessed cans that use medium base lamps.*
- 50 lb. maximum load rating.

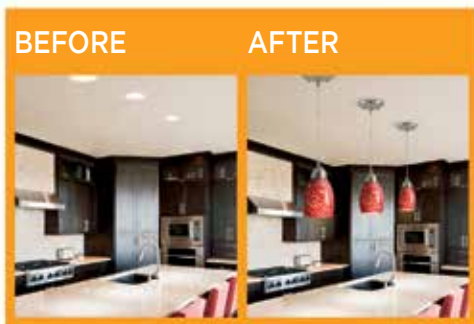

Note: Paintable decorative medallion and metal plate are optional when used on a 4" diameter recessed can.

0101108 Recessed Light Converter Shelf Display

11.3" L x 9.3" W x 10.3" H

- Easily change ordinary recessed lights into beautiful, modern lighting.
- Display the Recessed Light Converter using our Shelf Merchandiser.
- The perfect way to display inventory and increase your sales.
- Each display comes with 6 pieces of the Recessed Light Converter.

PATENTED
TECHNOLOGY

US PATENT NO.
9,496,699

*Recessed Light Converter works with existing recessed cans that use medium base PAR16, R16, A19, R20, PAR20, BR25, BR30, R30, PAR30, BR38, PAR38, BR40 or R40 lamps.

EASY-TO-INSTALL ELEGANCE

CHOOSING A MEDALLION

Consider these four factors when selecting the appropriate ceiling medallion.

FAN OR FIXTURE SIZE

- Medallions should be smaller or larger than the diameter of your ceiling fan or lighting fixture. They should not be the same size.

CEILING HEIGHT

- Higher ceilings can accommodate larger medallions.
- 28" or larger medallions complement a two-story foyer.

ROOM SIZE

- Large rooms accommodate large medallions.
- For a typical dining room with an 8' to 9' ceiling, a 20" to 28" diameter medallion works well.

MATERIAL

- Polyurethane medallions resemble traditional plaster medallions.
- Molded plastic medallions are lightweight and can be simply installed with adhesive.

PERSONALIZE YOUR DECORATIVE POLYURETHANE MEDALLION

- Lightweight polyurethane medallions can be installed finished or unfinished.
- Available in well-known architectural styles to complement molding or other architectural details.
- Installation hardware is included in all Westinghouse polyurethane ceiling medallions.
- For use with ceiling fans or lighting fixtures.
- Easily drilled or screwed.
- Will not warp, split or splinter.
- Easily caulked or spackled to hide installation hardware.

Simply apply adhesive and screw or nail into any surface.

Use unpainted or paint with any latex or oil based paint to create a look that matches any décor.

POLYURETHANE MEDALLIONS

INCLUDES MOUNTING HARDWARE:

- 1 - 3" 1/8-IP nipple

GLASSWARE GLOSSARY

FITTER (F)

Fitter size is the diameter of the glass where the glass attaches to the fixture or lamp.

HEIGHT (H)

Distance between the two farthest points opposite each other on the top and bottom of the glass that form a vertical line.

DIAMETER (D)

Distance between two opposite points at the widest part of the glass that form a horizontal line.

CENTER HOLE

The opening on a neckless shade and measured like a fitter. If a piece of glass has a fitter and a center hole, the center hole is used for lock-up.

DEPTH

Distance from the center point inside the glass to the point directly opposite, this is measured without mounting.

BULGE

The diameter measured at the widest part of a chimney.

TOP OPENING

Distance between the two farthest points opposite each other on the top of a student shade. All top openings are wide enough and made to fit over the average chimney.

THREADED NECK

A fitter that attaches to the fixture or lamp by means of threads in the glass.

NOTCHED FITTER

Designed to lock tightly into specially designed holders with ¼ turn.

PLASTIC MATERIAL GUIDE

FEATURE COMPARISON CHART

Feature	Polyethylene	Acrylic	Polycarbonate
Heat Resistance	G	G	E
Quality of Seams	F	E	E
UV Resistance	F	E	F
Strength	G	G	E
Light Transmission	F	E	G
