

RECYCLING ALERT

Fluorescent, compact fluorescent, and high intensity discharge lamps contain a small amount of mercury. They should not be included with regular solid waste disposal.

Mercury is a hazardous substance that is regulated by federal and state law. It has neuro-toxic effects, so it is important that mercury-containing products are properly managed to protect public health and the environment.

Contact your waste management service provider for information on proper disposal procedures for mercury-containing lamps. It is your responsibility to comply with local and state recycling laws.

For recycling information, regulations, and facilities, visit www.lamprecycle.org
